EL-ITP-12

12" Intelligent Touch Panel

With Face Recognition and Voice Control

Experience the intelligent home with the Nice EL-ITP-12 Intelligent Touch Panel. The EL-ITP-12 elevates the experience of any gSC or g1 Nice system by using face recognition to personalize the experience for individual users. And with integrated voice assistant technology, this control panel is fully interactive, unlocking the power of intelligent home control.

With edge to edge glass and a 1920 x 1080 resolution, this intelligent interface is elegantly designed to have a low profile on the wall while providing a rich Nice user experience. Whether through face recognition or the wave of the hand.

The EL-ITP-12 is designer-friendly as well. The panel is equally at home in both a horizontal and a vertical orientation, allowing it to be located in almost any area that would accommodate a 2-gang wall plate. The EL-ITP-12 is easy and flexible to install.
